The Ticking Crisis Clock

Ever wondered why major retailers like Target suddenly close multiple locations? Commercial power resilience failures cost U.S. businesses \$150 billion annually - equivalent to 0.7% of GDP. Last month's California grid emergency saw 21 manufacturing plants halt operations simultaneously.

Here's the kicker: Traditional backup generators fail within 48 hours in 78% of prolonged outages. As one hospital CFO confessed during recent Texas freeze: "We were counting diesel hours like final exam minutes."

Three Silent Business Killers

1. Voltage dips (85% of power issues) that fry sensitive equipment
2. "Phantom outages" lasting
