40% decline in the cost of lithium-ion battery storage by . This is evident as BloombergNEF's most recent levelized cost of electricity (LCOE) estimate for battery storage systems in February 20 mported an estimated 1.25 gigawatt-hours (GWh) of BESS in . This could increase to 8.75GWh, or 26% of t e projected peak demand in , if business as usual persists. Such a shift could lead to stranded national grid by reducing demand and raising capacity payments. Timely investments in grid "The average price of lithium-ion battery packs in Pakistan ranges between \$230/kWh and \$360/kWh," said the report. It added that on a macro level, the falling demand from the grid has led to financial losses and increased capacity payments for the government and remaining consumers.
