How many TWh of electricity storage are there? Today, an estimated 4.67 TWh of electricity storage exists. This number remains highly uncertain, however, given the lack of comprehensive statistics for renewable energy storage capacity in energy rather than power terms. Is electricity storage an economic solution? Electricity storage is currently an economic solution of-grid in solar home systems and mini-grids where it can also increase the fraction of renewable energy in the system to as high as 100% (IRENA, 2016c). The same applies in the case of islands or other isolated grids that are reliant on diesel-fired electricity (IRENA, 2016a; IRENA, 2016d). Which countries have the largest energy storage capacity? (28.5 GW) and the United States (24.2 GW) - accounting for almost half (48%) of global energy storage capacity. These countries are home to the largest capacities of pumped hydro storage, although they are emerging as significant locations for new and emerging electricity storage technologies. 6.8 GW of energy storage globally (Figure ES8). How many GW of energy storage are there in the world? 6.8 GW of energy storage globally (Figure ES8). Thermal energy storage applications, at present, are dominated by CSP plants, with the storage enabling them to dispatch electricity into the evening or around the clock. How will variable renewables affect electricity storage? As variable renewables grow to substantial levels, electricity systems will require greater flexibility. At very high shares of VRE, electricity will need to be stored over days, weeks or months. By providing these essential services, electricity storage can drive serious electricity decarbonisation and help transform the whole energy sector. Will non-pumped hydro electricity storage grow in ? The result of this is that non-pumped hydro electricity storage will grow from an estimated 162 GWh in to 5 821-8 426 GWh in (Figure ES3). energy mix. This boom in storage will be driven by the rapid growth of utility-scale and behind-the-meter applications.
