Can foreigners invest in battery storage businesses in Brazil? Investment, incentives and taxation scenarios According to Brazilian law, there are no legal restrictions on direct foreign investment in the battery storage businesses or in the power sector (except in very specific segments or sectors of the economy). Are battery energy storage systems at a premium in the future? Flexible generation and correlated solutions, including battery energy storage systems (BESS), are therefore likely to be at a premium in the future. How much does a 2MW battery storage system cost? In total, the cost of a 2MW battery storage system can range from approximately \$1 million to \$1.5 million or more, depending on the factors mentioned above. It is important to note that these are only rough estimates, and the actual cost can vary depending on the specific requirements and characteristics of each project. Are energy storage products coming to Brazil? Holu's Costa observed batteries were prominent during the Intersolar South America trade show held in São Paulo at the end of August. She added, hundreds of manufacturers are bringing energy storage products to Brazil. Could pumped hydro be the missing piece in Brazil's energy system? Conclusion Although energy storage solutions have yet to be widely deployed in Brazil, generation flexibility remains a scarce commodity. Therefore, storage projects, including pumped hydro, could be the missing piece needed to enhance the country's energy system. On average, the cost of lithium-ion battery cells can range from \$0.3 to \$0.5 per watt-hour. For a 2MW (2,000 kilowatts) battery storage system, if we assume an average battery cell cost of \$0.4 per watt-hour, the cost of the battery alone would be $2,000,000 * \$0.4 = \$800,000$.
