Well, three factors dominate Ethiopia's solar pricing landscape: A 5kW residential system that cost 180,000 ETB (\$3,200) in now averages 240,000 ETB. But wait, no - that's not the whole story. Actually, new financing models are changing the game. The National Electrification Program In Ethiopia, household electricity costs ETB 0.349/kWh, and commercial electricity costs ETB 1.223/kWh, while the price of solar in Ethiopia is rising too. 3. Government Commitment The Ethiopian government recognizes the value of renewable energy in achieving its environmental and economic goals. The average daily energy production per kW of installed solar capacity varies by season, with Spring yielding the highest output at 7.22 kWh/day and Summer producing the lowest at 5.42 kWh/day. Autumn and Winter also offer substantial generation potential with averages of 6.46 kWh/day and 7.00
