

Could solar storage system help Vietnam achieve low-emissions development? Hanoi (VNA) - The Solar Storage System (ESS) offers a low-cost and low-emissions solution for peak-hour power supply, helping Vietnam pursue low emissions development and ensuring economic growth, according to an expert at a workshop held in Hanoi on January 27. How a Bess project is promoting energy storage in Vietnam? Encouraging domestic enterprises to invest in new technologies will promote the growth of the energy storage industry in Vietnam. Investment in BESS projects in Vietnam is attracting the attention of international partners due to the country's strong potential for RE development. Is Vietnam a good market for energy storage solutions? Vietnam represents a promising market for German and European small and medium-sized enterprises (SMEs) specialising in energy storage solutions, thanks to their technical expertise and established reputation in RE technologies. Why is the demand for battery energy storage systems accelerating in Vietnam? Export-oriented businesses, especially in manufacturing, are under growing pressure to meet stringent requirements. At the same time, the demand for battery energy storage systems (BESSs) is accelerating, driven by Vietnam's abundant renewable energy (RE) potential, particularly in solar and wind power. Does Vietnam have a Bess project? Although no large-scale BESS projects have been implemented yet, Vietnam has put in place the conditions for BESS roll-out. Vietnam has a growing number of engineers and specialists in the RE sector. Training programmes at universities and research organisations are beginning to place emphasis on energy storage technology. How can Vietnam continue to promote re and Bess projects? Diversifying funding sources and support mechanisms is a crucial factor in helping Vietnam continue to strongly promote RE and BESS projects and, at the same time, achieve its energy transition and green-house gas emission reduction goals.
