

flow battery system tender price in Greece 2026

What are the final results of Greek battery storage auctions? The final results following the evaluation of potential objections on February 20, . The final round of Greek battery storage auctions will support the buildout of the system in in the coal mining region of Western Macedonia in northern Greece and four municipalities in Peloponnese - Megalopoli, Tripoli, Gortynia, and Oichalia. When will a battery storage project be up and running in Greece? The awarded projects must be up and running by the end of April , according to RAAEY. Greece awarded 400 MW and 300 MW of battery storage projects in earlier auction rounds held in and . Marija has years of experience in a news agency environment and writing for print and online publications. How many projects have been awarded in Greece's first battery energy storage system? The Greek Regulatory Authority for Energy has confirmed that 411.8 MW of projects have been awarded in the country's first standalone battery energy storage system (BESS) tender, which has attracted huge interest among developers. Investment and operating aid will be granted to 12 projects put forward by seven proponents. Does Greece have a battery storage pipeline? Greece has emerged as one of the countries with the largest pipeline of battery storage projects, but as yet there has been little activity on the ground. This is changing as the long-awaited storage subsidy auctions have started, with the first projects being awarded support for both investment and operating costs. Why is Greece launching a storage auction in ? Funding was first announced in as part of the National Recovery and Resilience Plan. Initially a response to the COVID 19 pandemic, the focus has pivoted to support Greece's green energy transition. The storage auctions themselves require further approval under EU State aid rules. The bidding price for projects is capped at 145,000 euros per MWh, and the tender is open to standalone battery storage proposals with four-hour storage capacities. Greece has officially launched its third tender for battery energy storage capacity, aiming to allocate 200 MW of projects eligible for subsidies of up to 200,000 euros per MWh. This tender marks the final phase of Greece's ambitious 1 GW program, which is designed to support the development of Greece has launched its third and final tender under a 1-GW program to support standalone battery energy storage systems (BESS), aiming to allocate 200 MW of capacity with available subsidies of EUR 200,000 (USD 217,920) per MWh. This move, approved by Greece's Regulatory Authority for Energy Interested parties can submit bids by December 23. Awarded projects will be announced in February and need to be connected to the grid by April . The Greek Regulatory Authority for Energy, Waste, and Water (RAAEY) has launched the country's third auction for standalone, grid-scale The Greek Regulatory Authority for Energy, Waste and Water (RAEWW or RAAEY) issued a public call for the country's third auction for subsidies for standalone battery storage projects. The quota for battery units is 200 MW in total operating power and an energy storage duration of four hours The second auction will award up to 300MW, lower than the first and with significant overcapacity expected to bid. Price expectations will be anchored around the prices achieved in the first auction, and we are likely to see bids around the lower end of the successful range.
