

Are there financial incentives for energy storage in Indonesia? There are currently no specific financial or regulatory incentives available in Indonesia to promote the storage of renewable energy.

5.3 What are the main sources of financing for the development of energy storage projects in your jurisdiction? Please refer to question 3.3 above.

6. How much should Indonesian government spend on local products? The Indonesian Government is mandating ministries/institutions and regional governments to allocate 40 percent of their budget to purchase local products.

How much does a CFPP cost in Indonesia? Coal-fired power plants (CFPP) and the hesitance of the utility company to adopt more variable renewable energy (VRE) due to its intermittency. CFPPs are still reported as the cheapest source of bulk generation in Indonesia with a cost varying between \$66 to \$95/MWh, while many countries will renewables help Indonesia achieve emission reduction targets?

75 Increased renewables will help the government achieve its emission reduction targets as stipulated in Indonesia's Nationally Determined Contribution to the Paris Agreement of 2015.

76 . . Indonesia plans to replace old coal power plants with renewable plants: minister. London. 77 Eco-Business. . Please cite this report as: King Energy Transition Succeed: A 's Update on The Levelized Cost of Storage in Indonesia. Jakarta Published in March 2018. This amount excludes coal subsidies in the form of a domestic coal price cap of USD 70/ ton and a fossil gas price cap of USD 6/MMBtu. Despite the significant increase in fuel costs, the cost of electricity generated by coal and fossil fuels is now, far more expensive than renewable energy.

Provides statistical tables and publications grouped into various CSA (Classification of Statistical Activities) subjects v1.1. Apart from that, the tables provided also include tables in Indonesian Statistics publications.

Energy - energy supply, energy use, energy balances, security of supply

This energy sector assessment, strategy, and road map (ASR) updates the state of the energy sector in the Republic of Indonesia since the publication of Indonesia Energy Sector Assessment, Strategy and Review by the Asian Development Bank (ADB). This ASR aims to provide background information on energy price preferences in government goods/service procurement to purchase domestic products with a TKDN value of at least 25 percent under laws and regulations. Integrate data and information on domestic products and products of micro-enterprises, small enterprises, and cooperatives through One Stop Service.

On March 4, 2018, the Ministry of Energy and Mineral Resources (MEMR) of Indonesia ratified the Ministerial Regulation (Permen) ESDM Number 5 of 2018 on Guidelines for Power Purchase Agreements (PPAs) from Renewable Energy Sources power plants. This is a subsequent regulation to Presidential Regulation No. 12/2015 on the Acceleration of Investment in Renewable Energy.
