

Should you invest in wind energy projects in New Zealand? Investing in wind energy projects can provide stable returns due to long-term contracts with energy providers. Hydroelectric power remains a mainstay in New Zealand's energy mix, and while large-scale projects may require significant capital, smaller community-based hydro projects can also be viable investment opportunities. Why is fuel storage important in New Zealand? The choice of fuel used for storage is critical for security, price stability and environmental impact. There is value in New Zealand having diversity for its storage solutions, as seen by the impact of the lack of gas in Winter . Working with every facet of the energy industry, to help clients respond to business issues and trends. Will Rankine power supply increase wholesale electricity prices in New Zealand? Concept Consulting's modelling shows that without thermal generation from the Rankine units as part of New Zealand's energy storage solution, wholesale electricity prices would likely be 60% higher in the short-term (the next two-to-three years) and 11% higher in the long-term (ten+ years). Will Huntly assets support New Zealand's energy security? Off the back of its experience in Winter , Genesis asked KPMG and Concept Consulting to assess the future requirement for Huntly assets to support New Zealand's energy security over the short, medium, and long term. Key takeaways from this report: Why is New Zealand a good place to invest in renewables? Structured for growth. Global demand for renewables is skyrocketing, and New Zealand is perfectly positioned to meet it, thanks to our abundance of accessible resources generated by hydro, wind, solar and geothermal. Are smart grids the future of New Zealand's energy landscape? Smart grid technology, which enhances the efficiency and reliability of electricity distribution, is another area ripe for investment. By supporting the integration of renewable energy sources and improving energy management, smart grids can play a significant role in the future of New Zealand's energy landscape. The need for energy storage: Firming New Zealand's Build new generation or storage assets, recognising that renewables could be an expensive option, but the investment case for new gas turbines is currently difficult. Net zero energy buildings in New Zealand: Challenges and For the renewable energy generation and distribution technological factor, various potential options for on-site and off-site building power sources are discussed, as well The need for energy storage Key takeaways from this report: Having a high degree of renewable energy generation means New Zealand needs the capacity to store energy for the times when nature does not align with The Project Financing Outlook for Global Energy Projects The rapid growth in the energy storage market is similarly driving demand for project financing. Like any other project-financed asset class, lenders will analyze both the amount and probability of receiving cash flows generated 127135|123800 While this document provides a general approach to selecting a financing mechanism for renewable energy generation, storage, and/or energy efficiency, it does not contain tax and/or Financing Energy Storage Deployment: What Are the Following Erik, Deanne Barrow outlined both equity and debt financing models for energy storage projects as well as some particular financial models that she has seen in her work. Deanne discussed the particular challenges both equity Energy Storage Financing: Project and Portfolio Valuation The difference is

that energy storage projects have many more design and operational variables to incorporate, and the governing market rules that control these variables are still evolving. ENERGY STORAGE PROJECTS The Department of Energy (DOE) Loan Programs Office (LPO) is working to support deployment of energy storage solutions in the United States to facilitate the transition to a clean energy economy. Accelerated by DOE initiatives, External Financing for Energy Projects The questions below are geared toward existing building upgrades. If it is a new construction project there may be more financing options, as well as the ability to combine financing Green Lending for NZ Developers | Sustainable Financing Guide Green Financing Options for Property Developers in New Zealand The landscape of property development in New Zealand is undergoing a significant transformation, Top 10 Energy Storage Investors in North America | PF Nexus Discover the current state of energy storage investors in North America, learn about buying and selling energy storage projects, and find financing options on PF Nexus. New Zealand's 'first grid-scale battery storage project' Electric power distribution company WEL Networks and developer Infratec have launched their grid-connected battery energy storage system (BESS) in New Zealand. The two companies said last Friday (20 Financing battery storage+renewable energy For example, Renewable Energy Systems has 90 MW of standalone batteries in operation and more than 55 MW under construction, including two 55 MW projects in the UK that provide Eku steps in New Zealand with BESS project purchase Eku Energy, the battery storage platform of Macquarie's Green Investment Group (GIG), has acquired an energy storage project in New Zealand, a move that marks its entry into the country. New Zealand considers 5TWh pumped hydro project The government of New Zealand is considering the viability of pumped hydro energy storage (PHES) among its options to plug energy deficits of between 3TWh and 5TWh. As the country increases its share of renewable Financing Energy Storage: A Cheat Sheet As such, we're providing this "Cheat Sheet for Energy Storage Finance" based on our work as buy-side and sell-side investment bankers experienced in both energy storage venture capital and project finance. I'm also including some SANDIA REPORT Abstract Project financing is emerging as the linchpin for the future health, direction, and momentum of the energy storage industry. Market leaders have so far relied on self-funding or Funding and Incentives Resource Hub | Better Buildings Initiative Looking to implement energy efficiency upgrades, renewable energy projects, or other initiatives? The Funding and Incentives Resource Hub can help you navigate and discover the many New Zealand's second emissions reduction plan -30 The Government is committed to delivering on our climate change commitments while growing the New Zealand economy. New Zealand can have prosperous Financing Energy Storage: A Cheat Sheet As such, we're providing this "Cheat Sheet for Energy Storage Finance" based on our work as buy-side and sell-side investment bankers experienced in both energy storage venture capital and project finance. I'm also including some Funding and Incentives Resource Hub | Better Looking to implement energy efficiency upgrades, renewable energy projects, or other initiatives? The Funding and Incentives Resource Hub can help you navigate and discover the many rebates, funding opportunities, and

other New Zealand's second emissions reduction plan The Government is committed to delivering on our climate change commitments while growing the New Zealand economy. New Zealand can have prosperous communities, affordable and secure energy, increasing Energy Storage Finance Investment Energy Storage Finance & Investment brings together the entire storage community, including the country's leading developers, tax equity investors, capital and debt providers, tax Contact to develop a grid-scale 100 MW battery in Contact's first renewable project in Auckland to start immediately. Tesla selected as battery energy storage system supplier, the first Megapack 2 XL project in New Zealand. The battery system will discharge stored energy at Explore Financing Options | Better Buildings Initiative Explore Financing Options Not sure where to start on energy efficiency or renewable energy financing? Use this page to explore financing options and see how they compare to each other. Zero Energy Buildings: Offices Zero energy offices are highly efficient commercial buildings that produce enough renewable energy to meet or exceed their energy consumption, making the energy created and energy consumed balance out to zero. Energy-efficient Nuts and bolts of financing storage The next big challenge for energy storage, after bringing down the cost so that storage is economic and finding a suitable business model, is financing. New projects | Meridian Energy At Meridian we have a pipeline of renewable electricity projects underway to help New Zealand maintain its security of supply and meet its climate change goals. In we set ourselves a target of building seven new large-scale renewable On-Site Energy Storage Decision Guide This could include building energy managers, facility managers, and property managers in a variety of sectors. A variety of incentives, metering capabilities, and financing options exist for
