Why is solar energy so expensive in Portugal? Portugal faces some of the highest electricity prices in Europe, driven by taxes and network costs. With rising electricity costs making it more expensive to power appliances, heat water, and cool homes, solar energy offers a cost-effective solution. What financing solutions are available for solar energy projects in Portugal? Here are some financing solutions for solar energy projects in Portugal, both for homeowners and businesses: European Investment Bank: The EIB has been actively supporting renewable energy projects in Portugal by providing companies with loans and other financial instruments. Is solar self-consumption a viable solution? While rising energy costs continue to strain Portuguese households and businesses, solar self-consumption offers a compelling solution. Switching to solar power can reduce your reliance on the traditional grid, take control of your energy costs, and contribute to a cleaner energy future. Why is the Algarve a good place for solar energy? The Algarve enjoys over 300 days of sunshine per year, making it one of the best locations in Europe for solar energy. With such abundant sunlight, homeowners can generate a significant portion of their electricity needs from solar panels, reducing their reliance on the grid and lowering electricity bills. How much energy can a solar system save a home? With the right system size, homeowners can meet up to 50% of their energy needs through self-consumption. Additionally, by incorporating solar batteries, this can increase to as much as 95%, allowing homeowners to store excess energy for use during the night or cloudy days, further maximizing energy independence. Do solar panels save money? By installing solar panels, homeowners can directly use the electricity they generate, reducing their reliance on the grid. With 50% self-consumption, a household could save around EUR805 per year on electricity bills. If a battery storage system is added, self-consumption can increase to 95%, boosting savings to over EUR1,500 per year.
