

## total investment cost of industrial energy storage project in Romania

How much money will be invested in Romania's energy sector? Today, the Minister of Energy, Sebastian Burduja, announced that an additional EUR150 million will be invested in Romania's energy sector. "I am pleased to announce that the Ministry of Energy is launching a new call for projects financed through the Modernization Fund, aimed at investments in energy storage capacities (batteries). How much money is needed for energy storage projects in Romania? The projects must focus on building new energy storage capacities in Romania," the minister stated. According to the minister, as quoted by ZF.ro, the total budget for this state aid scheme is EUR150 million in non-reimbursable funds sourced from the Modernization Fund. How much energy does Romania have in ? At the beginning of , Romania boasts approximately 3,000 MW in wind energy and 1,500 MW in solar energy. An additional 2,424 MW in wind and solar projects is expected to be operational in , attracting over EUR2 billion in investments. Romania's Energy Goals for Achieve over 32,000 MW in total capacity by . Electrica said the total project value is EUR21.8 million excluding VAT, and that the PNRR funding covers 20% of that. That investment amount equates to a capital expenditure of US\$346,714 per MWh of energy storage capacity. Electrica said the total project value is EUR21.8 million excluding VAT, and that the PNRR funding covers 20% of that. That investment amount equates to a capital expenditure of US\$346,714 per MWh of energy storage capacity. Romania has a potential market value of over EUR1 billion in investments for storage capacities in the coming years alone, based on announced projects and upcoming tenders, according to Cristian Barbu, Founder of Future Power, a local renewable energy developer. Currently, the country possesses less DNO and IPP Electrica has received EUR3.4 million (US\$3.8 million) in EU grants for a c.70MWh BESS project it will build in Romania. The listed company has won the grant funding from Romania's portion of the EU-wide National Recovery and Resilience Plan (PNRR), for which a EUR103 million budget was Romania expects its overall energy storage to amount to at least 2.5 GW in operating power at the end of , and to expand to as much as 5 GW a year later, local media reported, citing Minister of Energy Sebastian Burduja. These ambitious energy storage targets are aligned with transmission Following an assessment by the European Investment Bank under the Modernisation Fund, the European Commission announced on Thursday that it has paid EUR2.7 billion to support 39 investment projects in eight member states, according to a press release from the EU executive. The 39 projects include the Romania's Ministry of Energy announced it cleared the disbursement of grants under the Resilience Facility in the total amount of nearly EUR 36 million for five power storage projects with a combined capacity of over 790MWh. Among the recipients, there are investment vehicles of "a Dutch ket with power generation. In response to EU Regulation /943, which clarifies the role of storage and its ownership status, the Romanian authorities transposed in Law 155/ (amending Energy Law 123/) specific provisions related to new storage facilities and their management rules. Among Energy storage in Romania could reach EUR1 billion in investments Future Power is currently developing energy storage projects with a total capacity of 600 MW, with an ambitious goal of reaching 1,000 MW in the coming years. The
