

turnkey ESS container EPC contract price in Vietnam

What is an EPC contract? EPC stands for Engineering, Procurement, and Construction. An EPC contract is a type of construction contract where the contractor takes responsibility for the engineering, procurement, and construction activities of a construction project and delivers a completed final project to the employer or owner. Should EPC contracts be split in on- and offshore parts? If EPC contractors apply the "Credit Method", the split of EPC contracts in on- and offshore parts would not further mitigate tax risks. In the "Withholding Method" or "Hybrid Method", splitting EPC contract in on- and offshore parts might optimize FCWT. Do EPC contractors need a tax registration? A tax registration is only required if the EPC contractor applies the "Credit Method" or the "Hybrid Method". With both of these methods, EPC contractors will directly file and pay taxes with the tax authority. For the "Withholding Method", EPC contractors are not required to register for tax purposes. How do EPC contractors declare fcwt? EPC contractors can choose to declare FCWT under one out of three methods: the "Withholding Method", the "Hybrid Method" and (c) the "Credit Method". The default method is the "Withholding Method" by which deemed VAT and CIT rates apply on gross income, and all administration and tax payment responsibilities rest with the Vietnamese customer. » TTCL Vi?t Nam TTCL Vietnam Corporation Limited (TVC) specializes in providing integrated design and engineering, procurement of equipment and materials, and construction (integrated EPC)

CHALLENGES AND OPPORTUNITIES IN EPC
